FEEL THE LIGHTNESS OF BEING

The grace of the slender line – this is how the AMAZONE collection could be aptly characterized. Extra narrow panels accentuate the lines that seem to separate and join them at the same time. A floor for lovers of delicate elegance, and which is particularly suitable for smaller rooms, as its graceful lines give them the appearance of optical extension. The collection captivates with a variety of different decors, from almost monochrome to clearly patterned, which opens up a lot of space for different individual design preferences.
